

OBSESSIONS ARCHIVE PROJECT

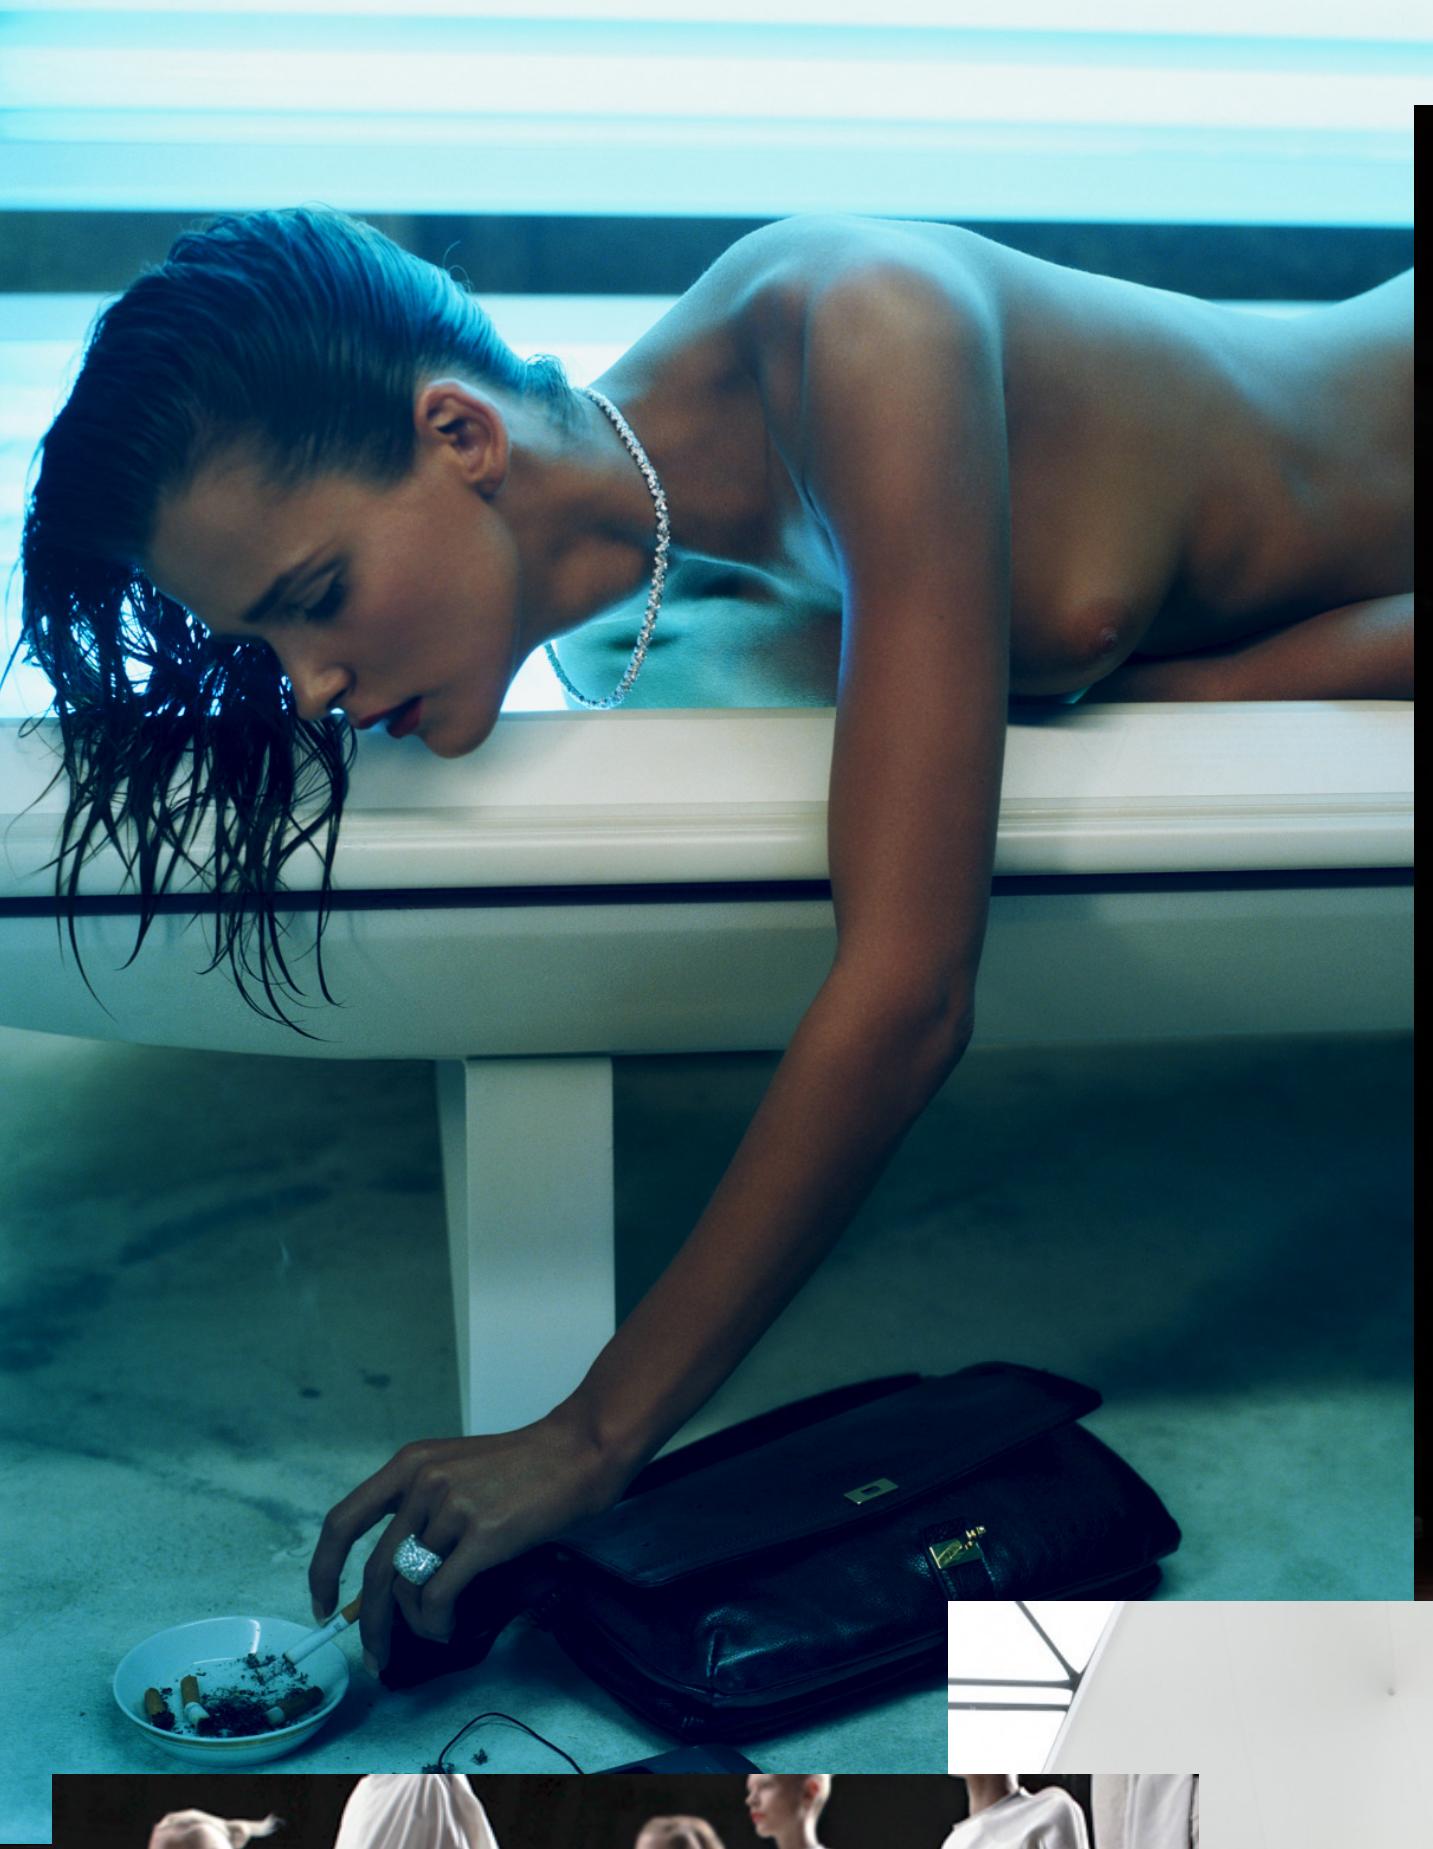

by Kyle Yu

I've broken down my personal archive ideas to these three things
They are

- 1 - Fashion archive
- 2 - All of my own work from my time here at Parsons as well as side work
- 3 - Interests i have that people most likely don't know I have

FASHION ARCHIVE

My first idea for a personal archive is to house all images that I've accumulated over the past years that have to do with fashion. Up until 2014 i had a tumblr that amount 15k followers. I only posted my own content (so to speak) so these images represent years of cultivating a blog with a following. The images are mostly others' images but have all been edited by me but I also want to include my own fashion drawings as well. To push this idea forward I might consider sticking to my favorite era of fashion - the early 2000s - or color code the images and archive them that way

WORK ARCHIVE

My second idea for a personal archive is to house all of my own work. It will include all of my work done at Parsons as well as work I've done on the side.

PERSONAL INTERESTS ARCHIVE

My third idea for a personal archive is to display all things that i am interested in that may not be fashion or my own work. For instance, I find roller coasters interesting (the design, the physics), government scandals/conspiracies (Watergate tapes), and music/film. The one issue with this is that most of it will be content that isn't mine but I think it could be an interesting challenge and will allow me to explore my personal interests more.
